ABOUT ME

I'm a curious CSE student at GLS University who loves exploring AI and ML. With skills in Python, Java, and C++, I enjoy turning ideas into smart systems and automation tools that make life easier. My goal is to keep learning, share fresh perspectives, and work on projects that make a real impact in the tech world.

EDUCATION

2022 - 2023

Shubham School

GHSEB (12th)

Stream : Science

Percentage : 74.30%

2023-2027

GLS University

B.Tech (Computer science)

Specialization : Artificial intelligence and Machine Learning

Grade : 8.3

PROJECTS

Restaurant Popularity Prediction

- This project leverages Zomato's historical dataset to predict a restaurant's popularity based on its specific location, cuisine offerings, and local market benchmarks.

- Build with **Python (Scikit-learn, joblib, plotly, pickle), Vite**

[GitHub](#)

Deepfake Detection

- Developed a multimodal deepfake detection system for identifying manipulated audio, image, and video content.

- Build with **Python, Tensorflow, CNN, AudioNet, XceptionNet**

SKILLS

- Python
- SQL
- Communication
- Time Management
- AWS
- JavaScript
- Problem Solving

CERTIFICATE

AWS Academy - Cloud Foundations

by Amazon Web Services
